

हे. अ. लोकसेवा Written प्रश्न पत्र उत्तर सहित

Required format and way of explaining the topics

Question 1: Explain the concept of General Medicine and its relevance in Public Health.

Answer: General Medicine, also known as Internal Medicine, is a branch of medicine that deals with the diagnosis, treatment, and prevention of a wide range of diseases affecting the internal organs. Physicians in this field, known as internists, are trained to manage patients who have undifferentiated or multi-system disease processes.

Relevance in Public Health:

1. **Disease Prevention and Control:** General Medicine contributes significantly to early diagnosis, timely treatment, and prevention of diseases, including non-communicable diseases (NCDs) such as diabetes, hypertension, cardiovascular diseases, and respiratory disorders.
2. **Primary Health Care:** General physicians are crucial in providing first-contact care and play a pivotal role in community health services.
3. **Health Education:** Physicians often educate patients on healthy lifestyles, disease prevention, and medication compliance, aligning with public health goals.
4. **Epidemiological Surveillance:** General Medicine helps in identifying disease trends in communities which informs public health interventions.
5. **Integration with Health Programs:** It supports national health programs like NCD control, maternal health, immunization, and infectious disease control.

Question 2: Discuss the structure and functions of the Health System in Nepal.

Answer: The Health System in Nepal follows a decentralized and three-tier structure: federal, provincial, and local.

Structure:

1. **Federal Level:** Ministry of Health and Population (MoHP) is responsible for national health policy, strategy, standards, and programs.
2. **Provincial Level:** Health Directorates under Provincial Ministries implement programs and coordinate district-level services.

3. **Local Level:** Local governments (municipalities and rural municipalities) are responsible for primary healthcare delivery, infrastructure, and resource mobilization.

Functions:

1. **Policy Formulation:** Development of health policies, acts, and strategies.
2. **Service Delivery:** Curative, preventive, promotive, and rehabilitative health services.
3. **Human Resource Management:** Recruitment, deployment, and training of health workers.
4. **Health Financing:** Budget allocation, insurance schemes, and donor coordination.
5. **Logistics and Supply Chain:** Procurement and distribution of medicines and equipment.
6. **Monitoring and Evaluation:** Ensuring quality through Health Management Information System (HMIS).
7. **Emergency Health Response:** Disaster and epidemic preparedness and response.

Question 3: What are the major components of Health Management? Describe in detail.

Answer: Health Management refers to planning, organizing, directing, and evaluating health services to improve efficiency and effectiveness.

Major Components:

1. **Planning:** Identifying health needs, setting objectives, and formulating action plans.
2. **Organizing:** Structuring resources and roles to implement the health plan.
3. **Staffing:** Recruitment, training, and retention of health personnel.
4. **Directing:** Providing leadership, supervision, and motivation.
5. **Budgeting and Financing:** Allocation and management of financial resources.
6. **Monitoring and Evaluation (M&E):** Assessing performance, identifying gaps, and improving service delivery.
7. **Information Management:** Utilizing health data for decision-making.
8. **Quality Assurance:** Ensuring standard protocols and patient satisfaction.
9. **Coordination and Communication:** Inter-sectoral coordination and community engagement.
10. **Logistics and Supplies:** Management of medicines, equipment, and infrastructure.

Question 4: Describe key public health policies of Nepal and their importance.

Answer: Nepal has adopted various public health policies to improve population health and achieve Sustainable Development Goals (SDGs).

Key Policies:

1. **National Health Policy 2076 (2019):** Focuses on universal health coverage, quality care, and equitable access.
2. **National Population Policy 2069 (2012):** Addresses reproductive health, migration, and demographic issues.
3. **National Mental Health Strategy and Action Plan 2077:** Aims to integrate mental health into primary care.
4. **Immunization Act 2072:** Legal framework to ensure routine immunization and vaccine safety.
5. **Nutrition Policy and Strategy 2071:** Promotes maternal and child nutrition.
6. **National HIV/AIDS Strategy:** Focuses on prevention, treatment, and stigma reduction.
7. **Health Insurance Policy:** Provides financial protection through the national health insurance program.

Importance:

- Promotes health equity
- Guides evidence-based decision-making
- Mobilizes resources efficiently
- Ensures accountability and good governance
- Strengthens the health system

Question 5: Explain the Health Acts and Regulations in Nepal that support public health services.

Answer: Nepal has enacted several laws to regulate and support public health services. These acts ensure rights to health, service quality, accountability, and professional ethics.

Major Acts and Regulations:

1. **Public Health Service Act, 2075:** Guarantees the right to basic health services and outlines responsibilities of government institutions.
2. **Health Professional Council Act, 2053:** Regulates licensing and conduct of health professionals.
3. **Drugs Act, 2035:** Ensures quality, safety, and availability of medicines.
4. **Immunization Act, 2072:** Supports routine and emergency vaccination.
5. **Safe Motherhood and Reproductive Health Rights Act, 2075:** Promotes maternal health and reproductive rights.
6. **Health Insurance Act, 2074:** Provides legal backing to implement and expand health insurance schemes.
7. **Food Act, 2023 and Regulations:** Controls food quality and safety.

These legal frameworks help in the standardization of health services, public trust building, and service coverage expansion.

Question 6: Discuss the role of Federal, Provincial, and Local governments in the Health Sector of Nepal.

Answer:

Federal Government:

- Policy formulation, strategic planning
- Health laws and regulations
- National programs and donor coordination
- Management of specialized and referral hospitals

Provincial Government:

- Implementation of federal health programs at provincial level
- Supervision of provincial hospitals and training centers
- Human resource development and deployment
- Emergency preparedness and outbreak response

Local Government:

- Primary health care delivery through health posts and PHCs
- Local health planning and budgeting
- Recruitment of basic health staff
- Monitoring of local health indicators
- Community awareness and sanitation programs

This tiered governance promotes decentralized decision-making and community involvement.

Question 7: How does the Health Information System support public health planning and monitoring?

Answer: Health Information System (HIS) is a vital tool for data collection, analysis, dissemination, and use in the health sector.

Key Functions:

MERO HEALTHLINE

1. **Disease Surveillance:** Tracks incidence and prevalence for targeted interventions.
2. **Monitoring and Evaluation:** Assesses program performance and outcome indicators.
3. **Planning and Resource Allocation:** Helps identify health needs and prioritize investments.
4. **Decision-Making:** Provides evidence for policy development.
5. **Early Warning Systems:** Alerts health authorities about epidemics and disasters.
6. **Reporting and Accountability:** Enhances transparency and documentation.

Tools Used in Nepal:

- Health Management Information System (HMIS)
- Logistics Management Information System (LMIS)
- District Health Information Software (DHIS2)
- e-HRMIS for staff management

Question 8: Analyze the challenges and solutions in the Public Health System of Nepal.

Answer:

Challenges:

1. **Inadequate infrastructure in rural areas**
2. **Shortage of trained health professionals**
3. **Weak supply chain management**
4. **Limited budget allocation and inefficient utilization**
5. **Poor monitoring and supervision**
6. **Political instability and corruption**
7. **Inadequate health education and awareness**
8. **Low insurance coverage**

Solutions:

1. Increase investment in rural health infrastructure
2. Capacity building and retention strategies
3. Strengthening logistic systems
4. Transparent and performance-based budgeting
5. Strengthening governance and coordination
6. Community participation in health programs
7. Expanding health insurance coverage

Question 9: Explain Universal Health Coverage (UHC) and its implementation in Nepal.

Answer: Universal Health Coverage means ensuring all individuals have access to needed health services without financial hardship.

Components:

1. **Access to Quality Health Services**
2. **Financial Risk Protection**
3. **Health Equity**

Implementation in Nepal:

1. **Health Insurance Board (HIB):** Manages national health insurance scheme.
2. **Free Basic Health Care Services:** Provided through public health institutions.
3. **Essential Drugs Program:** Ensures availability of free essential medicines.
4. **Expansion of Service Outlets:** PHC revitalization and upgrading facilities.
5. **Service Integration:** MNCH, NCDs, communicable disease control.
6. **Capacity Building:** HR training, curriculum updates.

Question 10: Describe the importance of Public Health Emergencies Management and Disaster Preparedness.

Answer: Public health emergencies (e.g., pandemics, epidemics, natural disasters) demand prompt response to minimize impact on health and society.

Importance:

1. **Protects public health and safety**
2. **Reduces mortality and morbidity**
3. **Prevents disease outbreaks**
4. **Minimizes health system burden**
5. **Maintains essential health services**

Nepal's Efforts:

1. **Health Emergency Operation Centers (HEOCs)**
2. **Rapid Response Teams (RRTs)**
3. **National Disaster Risk Reduction and Management Authority (NDRRMA)**
4. **Emergency Logistics and Medicine Stockpiling**
5. **Community-Based Disaster Risk Reduction (CBDRR)**

Preparedness ensures timely, coordinated, and efficient public health responses during emergencies.

Health Loksewa Notes Collection for HA | CMA | ANM | SN | LAB

 Your Shortcut to Success Starts Here!  

What's Included?

- ✓ **120 Comprehensive Study Notes (.pdf)** – All key subjects covered
- ✓ **50 Sets of Model Questions** – Based on latest Loksewa trends
- ✓ **40 Practice Question Sets** – Sharpen your skills
- ✓ **50 MCQs with Explained Answers** – Learn conceptually
- ✓ **50 Solved Past Questions** – Practice with real exam sets
- ✓ **80 Bullet Point Sets** – Quick topic-wise summaries
- ✓ **50 Golden Points Sets** – Perfect for last-minute memorization
- ✓ **50 Quick Review Notes** – Your final prep booster
- ✓ **1 Set of Public Management Notes** – Compulsory section simplified
- ✓ ***koshi province section complete note***

Perfect For:

- ✓ Health Assistant (HA)
- ✓ Community Medical Assistant (CMA)
- ✓ Auxiliary Nurse Midwife (ANM)
- ✓ Staff Nurse (SN)
- ✓ Lab Technician

Fee Structure:

- ◇ Rs. 549/-
